## Snow cutter Type VF 3-HR

Newly developed high-output heavy-duty machine, already successfully tested in numerous clearing operations. Especially suitable for layer cutting in extreme altitudes, i. e. spring openings of Alpine passes. Fully hydrostatic propulsion, separate drive for each track and therefore excellent driving characteristics. Newest version of track links, specially designed for snow and numerous other technical innovations. Clearing width 8'2,50 m. Propulsion engine Mercedes-Benz 80 HP Hydrostatic drive. Cutter drive engine Mercedes-Benz 225 HP.
