Snow cutter Type VF 3 for Unimog 406

Snow clearing machine with extremely high output, universally suitable for all types of snow and for different clearing operations. Generous proportions of drive unit, therefore faultless operation even under the most arduous conditions. Specially developed for the large Unimog, therefore imposing integral design of clearing implement and carrier vehicle with ideal snow clearing characteristics. Clearing width 8'2,50 m. Height of unit 5'1,50 m. Driving engine Mercedes-Benz 225 HP.
